The strength and performance of HEALIX Anchors™ – now with more features and options

HEALIX Anchors: the next generation

- Multithread configuration engages both cortical and cancellous bone more effectively than single-thread designs
- Available in 4.5-mm, 5.5-mm, and 6.5-mm sizes
- Accommodates 2 or 3 strands of ORTHOCORD® High Strength suture
- Needles available on 5.5-mm and 6.5-mm 2-suture anchors for mini-open procedures
- Available in radiolucent PEEK and BIOCRYL® RAPIDE™(BR) biocomposite material that allows absorption and bony ingrowth[1]

Anchor Fixation Strength Average (N)

HEALIX ADVANCE anchor with needles for mini-open procedures

Getting your patients back to their passion is our passion.

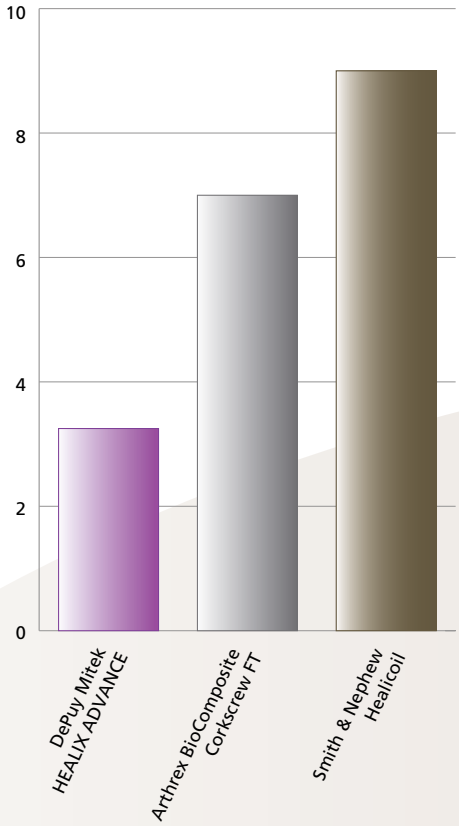

Repair integrity

- Wide variety of surgical options
- Greater torque strength that allows for insertion in a variety of bone densities*
- Promotes bone growth formation at the implant site with the BR anchor option[1]
- Secure fixation demonstrated through high pullout strength[2]
- Cannulation to channel blood flow to surface

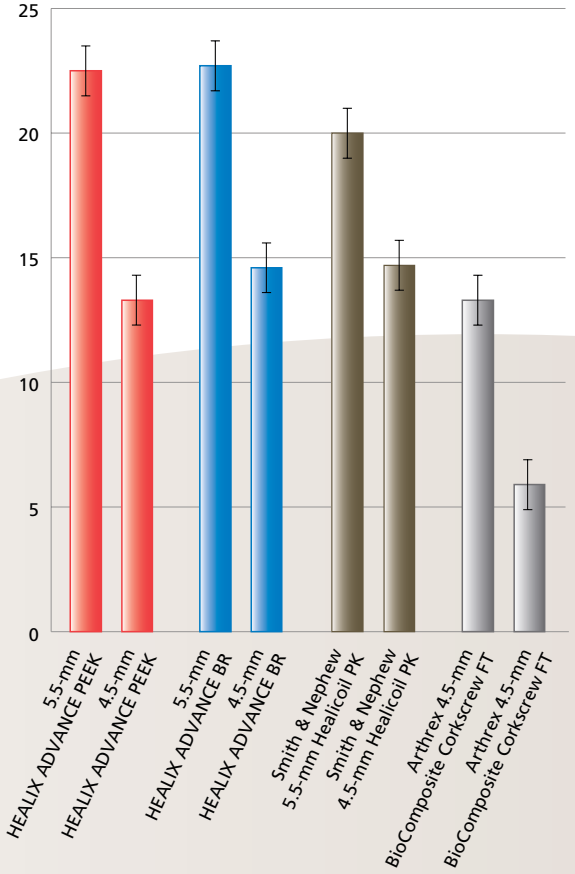

Distal suture bridge with channel to enable blood flow

Turns to Insertion

Torque Strength: Anchor TTF Average (in-lb)

Streamlined anchor insertion procedure

- Optimized instrumentation for punch-only technique in most bone densities
- Distal aiming nose for precise anchor placement and suture protection
- New multithread design reduces the number of turns by 50%*
